MOLINO
TERRAMADRE

SINERGO 2019

IGT TOSCANA

Vineyard	Terramadre - North East facing
Appellation	IGT Toscana
Soil	Rich composite of clay based soil with a high proportion of marine deposits, shells and fossils
Planting Density	5,400 vines / hectare
Grape Composition	100% Sangiovese
Pruning	Guyot
Vinification	Destemming, pressing and manual selected berry by berry, the grapes macerated for 30 days in open wood tonneaux with natural, indigenous yeast
Ageing	Ageing continued in tonneaux for 24 months followed by the necessary time in bottle before release
Total Area Under Vine	1 hectare
Vintage 2019	The season was extremely kind to us in 2019. It was one of those years where the weather seemed to be exactly as you would wish to produce great wines. In spring, the rains were moderately abundant, allowing for good water accumulation in the soil reserves. During budding, below-average temperatures caused a slight delay in the early phenological stages, which was completely recovered from flowering onward. The summer was moderately dry and hot, allowing the vines to grow in a balanced way and begin veraison at the right time without health issues. After veraison, mild temperatures and significant thermal excursions, combined with sporadic, light rains, allowed the grapes to reach the harvest in perfect health and with excellent physiological and phenolic maturity.
Bottles Produced	1,200
Alcohol	14.5 %
